Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/917,278

Applicant(s)

GORCZYNSKI ET AL.

Examiner

Jessica H. Roark

Art Unit

1644

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 January 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 10-14 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 10-14 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- 1) ☐ Certified copies of the priority documents have been received.
 - 2) ☐ Certified copies of the priority documents have been received in Application No. _____.
 - 3) ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 1644

RESPONSE TO APPLICANT'S AMENDMENT

1. Applicant's amendment, filed 1/7/04, is acknowledged.

Claims cancelled: 1-9.

Claims added: 14.

Claims currently amended: 10, 12 and 13.

Claims pending: 10-14.

Claims 10-14 are under consideration in the instant application.

2. This Office Action will be in response to applicant's arguments, filed 1/7/04 .

The rejections of record can be found in the previous Office Action.

It is noted that New Grounds of Rejection are set forth herein.

Claim Rejections - 35 USC § 112 second paragraph

3. The following is a quotation of the second paragraph of 35 U.S.C. 112.

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14 depends from claim 10 and recited "wherein the hematopoietic cell cancer is". However, claim 10 is not limited to a hematopoietic cancer and claim 14 therefore lacks antecedent basis. It appears claim 14 was intended to depend from claim 12.

Applicant is reminded that any amendment must point to a basis in the specification so as not to add new matter. See MPEP 714.02 and 2163.06.

Claim Rejections - 35 USC § 112 first paragraph

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1644

6. Claims 10-14 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention.

Applicant's arguments, filed 1/7/04, have been fully considered but have not been found convincing, essentially for reasons of record.

The rejection of record is incorporated herein as if set forth in full. Applicant's arguments are addressed below.

Claim 10 as amended requires that the cancer treated in the method of treating be a cancer treatable by reducing, inhibiting or preventing immune suppression caused by CD200 (OX-2). Claim 12 limits the cancer to a hematopoietic cell cancer, and claim 14 further limits the cancer to a leukemia.

As previously noted, the specification provides a working example on pages 83-85 and Figure 24A showing that in mice pre-immunized with a CD86 transfected form of leukemic cells prior to challenge with the wildtype leukemia, administration of an anti-CD200 (anti-OX-2) antibody at the time of wildtype tumor challenge improved survival. However, Figure 24A also shows that the effect was only seen in pre-immunized mice: administration of the antibody in mice without pre-immunization did not improve survival. In addition, the specification notes that no improvement of survival was seen when mice were pre-immunized with CD80 transfected cells, then challenged and given anti-OX-2 antibody.

The specification also provides a working example on pages 91-92 and Figure 30 showing that anti-OX-2 antibody could inhibit the enhancement of lung nodule formation that accompanied the administration of allogeneic leukocytes following I.V. administration of cultured sarcoma cells. However, Figure 30A also shows that administration of anti-OX-2 was not by itself sufficient to reduce the number of lung nodules compared to PBS alone, and Figure 30B shows that the percentage of mice showing no lung nodules after tumor cell administration was actually decreased compared to administration of PBS.

The Examiner previously concluded that although the specification does provide two examples in which tumor growth was inhibited by an antibody to the OX-2 (CD200) molecule, the results appeared to be limited because in neither the pre-immunization model nor the lung nodule formation model did simple administration of the anti-OX-2 antibody appear to have a beneficial effect.

Applicant notes that the differential effects observed depend upon the expression of CD200/OX-2 and that this expression can be determined using the animal immunization model described in the specification or using methods routine in the art. Claim 10 as amended is limited to those cancers that can be treated by reducing, inhibiting or suppressing immune suppression caused by CD200.

However, the specification does not appear to provide sufficient guidance such that the skilled artisan could practice the method without undue experimentation. Although methods exist for determining if a given tumor expresses CD200 or if tumor immunization enhances CD200 expression, the skilled artisan requires guidance as to which tumor types would be expected to meet these criteria. Post filing date references showing that other cancers besides the working examples described supra express or induce CD200 do not correct for the lack of guidance provided in the specification as filed as to which cancers fall within this genus.

Applicant's comments regarding the therapeutic utility of modulating the CD200 cascade in other systems where immunosuppression is beneficial are acknowledged. However, the instant claims are distinct because they require the enhancement of the immune response (i.e., the immune suppression induced by CD200 is suppressed, providing a new result of enhancement). The rejection of record is with respect to

Art Unit: 1644

It is again noted that even when data has been provided suggesting that antibody therapy of a particular tumor type was effective in animal models of particular types of cancers, the state of the art recognized that it was unpredictable if success in one or a limited number of models could be generalized. Kim et al. (Cancer Res. 2001; 61:2031-2037, of record) and Kjaergaard et al. (Cancer Res. 2000; 60:5514-5521, of record).

Thus in view of the unpredictability associated with the field of monoclonal antibody therapy of cancer and the lack of sufficient guidance as to which cancers involve CD200-mediated suppression, there does not appear to be enabling support for the instant methods.

Conclusion

7. No claim is allowed.

8. Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jessica H. Roark whose telephone number is (571) 272-0848. The examiner can normally be reached on Monday from 7:30 to 4:00, and on Tuesdays and Thursdays from 10:00 to 4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan, can be reached at (571) 272-0841. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
